

FEASTIGO Business Intelligence Dashboard

Project Name: Feastigo Business Intelligence Dashboard

Prepared By: Gopika siri. p

Project Type: Data Analytics Portfolio Project

PHASE 1 - :-

1.What is Feastigo?

FeastiGo is an online food delivery platform that connects customers, restaurants, and delivery partners through a single application. Customers can browse nearby restaurants, order food, make payments, and track their deliveries in real time. Restaurants receive the orders, prepare the food, and hand them over to delivery partners. The delivery partners collect the food from the restaurant and deliver it to the customer. Feastigo manages the entire ordering and delivery process, making food ordering convenient for both customers and restaurants.

By collecting data from every order, Feastigo can analyze customer behavior, restaurant performance, delivery efficiency, and business growth. This data helps the company make better business decisions.

2. Business Model

Business Model

Feastigo is an online food delivery platform that connects customers, restaurants, and delivery partners through a mobile application. Customers

browse restaurants, place food orders, make online or cash payments, and receive deliveries at their location.

Restaurants prepare the ordered food and hand it over to delivery partners. Delivery partners pick up the orders and deliver them to customers.

Feastigo earns revenue through commissions from restaurants, platform fees, delivery charges, and promotional services.

3. Stakeholders

Stakeholder	Role
Customers	Place food/grocery/parcel orders and make payments
Restaurants/Stores	Prepare food and accept orders
Delivery Partners	Deliver food/grocery/parcels to customers
Operations Team	Manage platform operations
Customer Support Team	Resolve customer issues
Marketing Team	Manage orders and customer engagement
Finance Team	Track revenue and payments

4. Revenue Model

Revenue Sources

Feastigo generates revenue through multiple sources:

- Restaurant Commission (10–15%)
 - Platform Fee (₹7 per order)
 - Delivery Charges
 - Promotional Advertisements from Restaurants
 - Subscription Plans (Future)
 - Convenience Fees (if applicable)
-

5. Business Workflow

Customer

Browse Restaurants

Place Order

Restaurant Accepts Order

Food Preparation

Rider Assigned

Order Pickup

Order Delivered

Payment Completed

Customer Rating & Review

6. Key Performance Indicators (KPIs)

Total Orders	Total number of completed orders
Revenue	Total income generated
Average Order Value	$\text{Revenue} \div \text{Orders}$
Delivery Time	Average delivery duration
Cancellation Rate	$\text{Cancelled Orders} \div \text{Total Orders}$
Customer Retention	Returning customers
Restaurant Rating	Average restaurant rating
Rider Utilization	Orders completed per rider
Coupon Usage	Percentage of orders using coupons

7. Business Objectives

The primary objectives of Feastigo are:

- Increase total food orders.
- Improve customer satisfaction.
- Reduce delivery time.
- Increase restaurant partnerships.
- Improve rider efficiency.
- Increase customer retention.

- Expand to new cities.
 - Maximize business profitability.
-

8. Business Problems

- High delivery time during peak hours.
 - order cancellations.
 - Low customer retention.
 - Uneven rider distribution.
 - Restaurant preparation delays.
 - Low-performing restaurants.
 - Late deliveries.
 - Low ratings to food .
 - Increasing operational costs.
-

9. Business Questions

1. Which restaurants generate the highest revenue?
 2. Which area has the most orders?
 3. Which customers order most frequently?
 4. Which riders deliver the highest number of orders?
 5. Why are customers cancelling orders?
 6. What are the busiest ordering hours?
 7. Which payment method is used most?
 8. Which coupons increase sales?
 9. Which restaurants have poor ratings?
 10. Which city should Feastigo expand into next?
-

10. Success Metrics

The project will be considered successful if it helps Feastigo:

- Reduce average delivery time.
- Increase customer retention.
- Improve rider efficiency.
- Increase total monthly revenue.
- Reduce order cancellations.
- Improve restaurant performance.
- Increase customer satisfaction.
- Support data-driven business decisions.
